

# AN INNOVATIVE SOLUTION IN YOUR OR

Ecolab's Mojave NG disposable linens offer a unique solution to help reduce the risk of SSIs in the Operating Room. With disposable Mojave, your team can eliminate the uncertainty of laundering effectiveness. Using Mojave NG for every procedure, your hospital can provide each patient the same standard of care from the first case of the day to the last. Mojave NG also now offers three key features that other linens can't match:

## IMPROVED ABSORBENCY

This Mojave NG bed linen was designed to absorb more fluids and absorb faster than any product on the market. Super-absorbent polymers wick fluids away and lock them in.

Testing shows this single use linen keeps the patient's skin x3 dryer than a laundered cotton sheet. This lessens patients' exposure to fluids, skin shear and friction, consequently promoting Skin Health.

## BREATHABLE & IMPERVIOUS

Mojave NG's upper layer provides breathable, comfortable contact to patient while its impervious backing prevents strike through, which limits cross contamination risk and facilitates room turnover—as well as helps preserve OR mattress life.

## ENHANCED BIO-DEGRADATION PROCESS

Finally, we have incorporated the Genesys technology into the impervious backing of Mojave NG, thereby enhancing its ability to break down in landfills over time. This is safer for the patient and the environment.

## FOCUSED ON SOLVING THE BIG PROBLEMS

At Ecolab we aim to answer all your challenges with a combination of great products, support and data. We deliver this through our Ecolab Healthcare Programs combining technology, service, training and information.

## PRODUCT RANGE

Product Ref	Description	Case QTY
NGATC4090N-EU	Ecolab Mojave NG Absorbent Table Cover (101 cm x 228 cm)	42 / case
NGABTSLSCN-EU	Ecolab Mojave NG Absorbent Table Cover (101 cm x 228 cm) with Transfer Sheet & Armboard Covers & Headrest Cover	24 / case
NGABTSLSAN-EU	Ecolab Mojave NG Absorbent Table Cover (101 cm x 228 cm) with Transfer Sheet & Armboard Covers	24 / case
NGABTSLSN-EU	Ecolab Mojave NG Absorbent Table Cover (101 cm x 228 cm) with Transfer Sheet	30 / case
LFTSH34N	Patient Transfer Sheet (86 cm x 168 cm)	50 / case
LFTSH80N	Patient Transfer Sheet (102 cm x 203 cm)	50 / case
AE5692N-CS-EU	Headrest Cover	100 / case
LABWS-01N-CS-EU	Armboard Cover with Strap	150 / case
3055NS	Absorbent Floor Pad (81cm x 122cm)	25 / case

# Protecting patients where and when it matters the most.

## MOJAVE™ NEXT GENERATION (NG) DISPOSABLE LINENS

Mojave NG technology makes laundered linens obsolete - and your surgical team will immediately notice the difference. Improved rate and speed of absorbency combined with the impervious backing, provides an effective barrier to your OR tables and mattresses.

**REDUCE INFECTION RISK**

Prevention of hospital acquired infections with the potential source as contaminated OR bed or mattress.

Prevention of patient skin breakdown due to wet or wrinkled reusable OR bed linens.

**IMPROVE EFFICIENCY**

Quicker OR turnover times due to less fluid contamination on OR tables and the floor.

No additional steps related to used linens, such as laundry and transport.

**PROTECT HOSPITAL ASSETS**

Increased lifetime of OR bed and/or mattress by avoiding harsh chemicals required for blood contaminated surfaces.

Fewer stains on the OR floor related to antiseptics usage.

“Oh, I’m impressed. Once it has the chance to soak in, it’s not wet to my touch...  
...It’s way better for my patients than a cloth sheet.”

EORNA Focus Group,  
OR Nurses and OR Nurse Managers

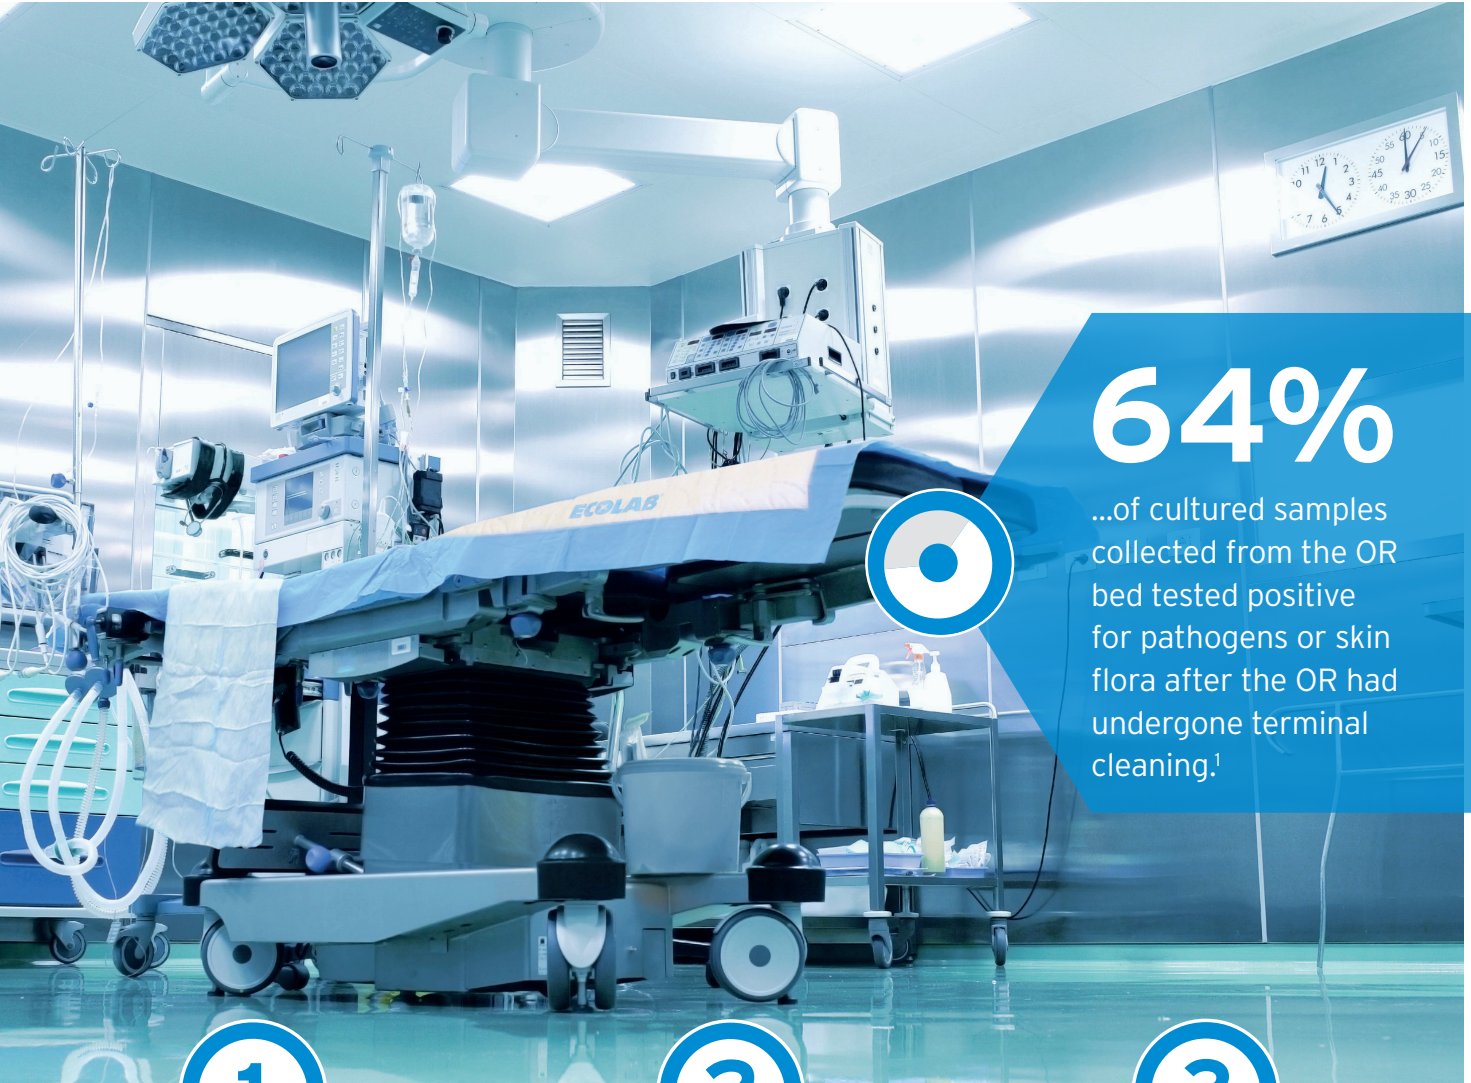

## ECOLAB® OR PROGRAM FEATURING MOJAVE™ NG DISPOSABLE LINENS

When you partner with Ecolab, you are surrounded with the knowledge, expertise and support your team needs to take full advantage of Ecolab infection prevention technologies.

The Ecolab OR program focuses on assessing your daily challenges with objective monitoring tools and developing a solution strategy that includes technology, information, training and service.

Our mission is to become your true partner in healthcare, making it easier for your surgical teams to fight SSIs, improve room cleanliness, reduce turnover time and optimize patient experiences.

### SSIs: A MAJOR CHALLENGE FOR HOSPITALS

64%

...of cultured samples collected from the OR bed tested positive for pathogens or skin flora after the OR had undergone terminal cleaning.<sup>1</sup>

- 1
- 2
- 3

OR nurses report that blood and other fluids soak through laundered linens in 1/3 of all surgeries, exposing the mattress to bacterial contamination that could put future patients at risk.<sup>2</sup>

OR nurses & staff reaffirm that linen sheets are not always clean after laundry and are frequently stained or contaminated with tape residue.<sup>2</sup>

It is difficult to ensure that OR mattresses are cleaned in a consistently thorough manner, even though 4 minutes out of 26 minutes of OR turnover time is used for cleaning the OR mattress.<sup>2</sup>
